DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on 9/15/2005 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,5,8,14,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stevens et al. (US 5,599,577) in view of Drug Launches (1993), Schmidt et al. (US 5,418,220). Holtmann et al. and Gaginella et al..

Stevens et al. disclose the combination of simethicone, preferably in the range of 20 mg to about 125 mg per dosage unit, generally not to exceed 500 mg/day, to a patient suffering from gas and a pharmaceutical suitable for treatment of gastrointestinal disorders (Column 4, lines 38-54).

Drug Launches (1993) discloses the combination of simethicone and 10 mg of bisacodyl which is used to treat constipation, facilitate bowel motion and evacuation of intestines (Abstract).

Schmidt et al. (US 5,418,220) disclose that simethicone is effective in treating constipation (Column 2, lines 35-68, Column 3, lines 1-3, Claims 2,7,8).

Holtmann et al. teaches that simethicone is effective in treating dyspepsia associated with disturbance with GI motility in addition to its effects on gas-related symptoms and that simethicone may stimulate gastrointestinal motility (see entire reference, especially, Pg. 1464).

Gaginella et al. discloses that bisacodyl significantly increased transit of marker through the small intestine (Pg. 1242).

The difference between the prior art and the claimed invention is that the prior art does not expressly disclose the combination of bisacodyl and 10 to 500 mg of simethicone or a method of improving small bowel motility in a human or for enhancing the small bowel motility increasing effect of bisacodyl by administering said composition. However, the prior art amply suggest the same as the prior art discloses the combination of simethicone in the claimed dose with pharmaceutical which is suitable for treatment of GI disorders, that bisacodyl and simethicone are suitable for treatment of constipation, that bisacodyl increases transit of a marker through the small intestine and that simethicone may increase GI motility. As such, it would have been well within the skill of and one of ordinary skill in the art to modify the prior art as above with the expectation that the combination of simethicone and bisacodyl would be suitable for treatment of constipation and be effective increasing small bowel motility.

Therefore, the claimed invention, as a whole, would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, because every element of the invention has been collectively taught by the combined teachings of the references.
